

PHP Scripting and MySQL (PHP)

Course overview

Learn how to build your own database connected website. By starting to build websites using PHP and MySQL – the most popular general purpose scripting language and relational database management system (RDBMS) used on the web today - you can take your website designs to the next level and break free of the “brochure-site” syndrome. Learners should have some experience with Windows operations and XHTML.

Suitable for

This introductory level course is suitable for anyone who is interested in web development. It equips you with the skills to operate effectively as a Web Developer.

Course outcomes & benefits

By the end of this course you will have built a database-driven web Content Management System (CMS) that powers a front-facing website. You will be able to write PHP programs that can get data from a MySQL database and display the results as a web page. You will also learn how to install and configure Apache, MySQL and PHP on Microsoft Windows XP.

Course content

- Introduction to PHP and MySQL
- Getting Started with MySQL
- Getting Started with PHP
- Publishing MySQL Data on the Web
- Advanced PHP
- A Database Driven Website

Duration & course dates

10 three-hour sessions (2 evenings per week for 5 weeks)
Mon & Wed 10/11/08 to 10/12/08

Cost

\$910

Assessment

There is no assessment on this course.

Location

Ground Floor UNSW L5 Building, 223 Anzac Parade, Kensington NSW 2033
